

OCTOBER 2008 WHOLESALE SPECIALS

Great Deals on Colorful Minerals That Sell Fast!

Smithsonite, El Refugio Mine, Choix, Mexico. Small pieces in shades of purple or bluish-green mounted on styrofoam in 1" by 1" fold-up boxes for \$1 each, and large 4" pieces on matrix for \$15. We have 12 of the large pieces.

STICHTITE, Serpentine Hill, North Dundas, Zeehan District, Tasmania, Australia. We have pieces about 2" by 3" to 2.5" by 3.5" for \$12 and \$15 by size, and larger pieces for \$20 to \$50. We will supply you with a copy our highly detailed Stichtite write-up along with your purchase so you'll become an expert on this rare and desirable mineral, from this classic locality. It's great to offer a rare mineral that is actually attractive!

We also have smaller pieces of light purple stichtite in green serpentine matrix, a combination marketed under the name "Atlantasite" by the miners, as seen in the photo below. We have small specimens about 1.5" by 1.5" and larger for \$2.00 each, as seen in the photo in Figure 2, or \$50 for a flat of 35 pieces. We also have 2.5" by 2.5" pieces for \$4.00 each, or a flat of 20 pieces for \$60.

Smithsonite, El Refugio Mine, Choix, Mexico.

STICHTITE, Serpentine Hill, North Dundas, Zeehan District, Tasmania, Australia, above and below.

SPECULAR

HEMATITE, Northern Michigan. Flats containing 35 pieces about 1.5" by 1.5" for \$40. This material is too soft to polish, and is coated with acrylic instead--you probably remember it from our booth in Tucson. The smaller pieces work great for wire-wrapping, and folks love this material at shows because it's different.

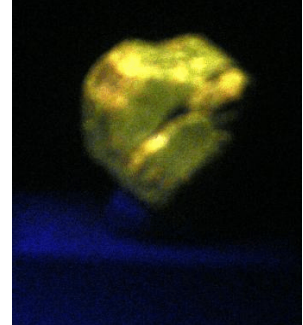

JADE CABS, British Columbian, in packs of 10:

6mmx8mm Jade cabs \$4 for pack of 10

8mmx10mm Jade cabs \$5 for pack of 10

OCTOBER 2008 WHOLESALE SPECIALS

ZIRCON, Mud Tank Carbonatite, Harts Ranges, Northern Territory, Australia. These are root-beer colored single crystals, with the rough outline of its crystal form, like in the photo on the left. Most of the zircons fluoresce yellow under shortwave UV light, as seen on the right. We have crystals about 1" by 1" and slightly larger for \$1, and 2" by 1" for \$2. An excellent deal!

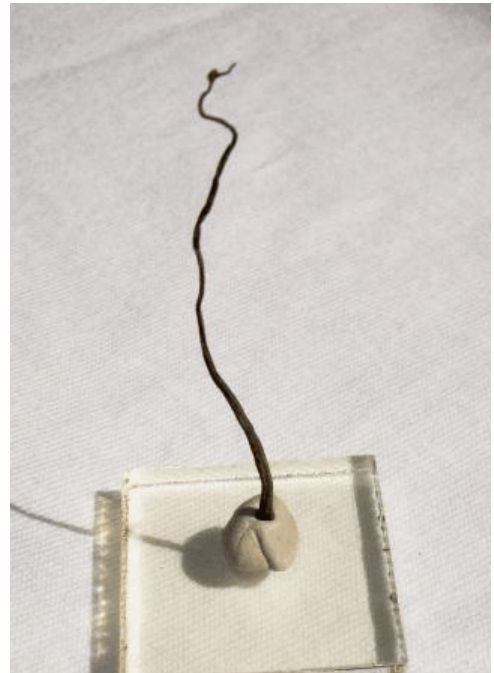

NATIVE SILVER, Huantongxian mine, Lujiang County, Anhui Province, China, as long, thin, wire-like crystals--yes, these wires are actually natural silver crystals! (Photo at bottom of Email.) We have:

Native wire silver, thin curving wires about .5" long to over 1.25" long for \$1 each. We have about 35 pieces left.

Native wire silver, 1.5" to 2" long, \$5 each. We have about 18 specimens left.

Native silver, shorter, stubbier specimens, .5" long but thicker, about 1/8" thick, for \$5. We have about 16 left.

Higher quality, longer pieces, 2" to 3" long, \$25. We have 8 left.

NATIVE SILVER, Anhui Province, China.

ADAMITE, Ojuela Mine, Mapimi, Durango, Mexico. Most pieces fluoresce neon yellow-green in short and longwave UV light:

Small crystal on matrix pieces mounted and glued on styrofoam in 1" by 1" fold-up boxes \$1 each, 90 cents for all. We have 32 pieces.

2" by 2" to 2" by 3" matrix specimens with small crystals \$3 for 2" by 2", \$4 for 2" by 3". We have 12 pieces.

CUPRIAN ADAMITE, Ojuela Mine, Mapimi, Durango, Mexico, the rare variety where copper replaces some of the zinc in the crystal structure and turns the crystals blue-green rather than the typical yellow-green of adamite. Very unusual and attractive groups of small crystals in lovely shapes, on reddish-brown limonite matrix. 2" by 2" matrix and slightly larger for \$20; 2.5" by 3.5" matrix and slightly larger for \$30.

OCTOBER 2008 WHOLESALE SPECIALS

AMAZONITE CRYSTALS, Crystal Peak area, Teller County, Colorado, another of the 44 localities chosen for the "American Mineral Treasures" exhibit and book. We have excellent single crystals about 1" by 1" and slightly larger with beautiful greenish-blue color, some with white caps, and excellently formed faces and terminations for \$6, \$8, and \$10 by size.

ARSENOPYRITE, Yaogangxian mine, Hunan Province, China. Groups of luster silvery metallic crystals about 1" by 1" for \$1, 2" by 2" for \$3, and about 2.5" by 3.5" for \$6.

STELLERITE, Aurangabad, Maharashtra, India. We have stellerite on matrix, with the matrix being about 2" by 1.5" with a good coverage of crystals with good color and excellent crystal form for \$3, and larger matrix pieces about 2.5" by 2" for \$5. We have about 20 left.

GYPSUM PSEUDOMORPH AFTER GLAUBERITE, Camp Verde, Yavapai County, Arizona. Clusters of large, well-formed white crystals jutting out in every direction! 2" by 3" pieces for \$2, and 3" by 4" pieces for \$3. Minimum six pieces.

LOT of 50 RARE RUSSIAN MINERALS Email us if you want details on this lot--some specimens could go in your collection, and the rest could be sold.

LOOKING FOR RARE AND UNUSUAL MINERALS TO OFFER YOUR BUYERS? Check out our 15 page list, available online at our web site at mineralofthemonthclub.org. Your discount is 50% on almost everything on the list. We can send it to you as a PDF file if you wish.

These special offers are intended for wholesale buyers only. Please Email me back or call me at 805-927-2223 if you have any questions or would like to place an order. Quantities are limited. We'll send you a copy of our Mineral of the Month Club write-up to go along with any minerals you order that we've featured in the past, which will give you some good information to share with your customers. (But please don't photocopy or otherwise distribute the write-ups--they are copyrighted.) Thanks very much!
